Acknowledgements

This report was prepared by Maile Beatty, Abbie Averbach, Eric Rubinstein, Jennifer Logan, and Renee Woliver of the HIV/AIDS Bureau. Jean Flatley McGuire, Former Director of the HIV/AIDS Bureau, Kevin Cranston, Acting Director of the HIV/AIDS Bureau, Alfred DeMaria, Assistant Commissioner of Public Health and Director of the Bureau of Communicable Disease Control and James Murphy, Director of the HIV/AIDS Surveillance Program provided guidance for the report. Special thanks go to Thomas Bertrand, Director of HIV/AIDS and STD Surveillance Programs, Betsey Philip and Bikash Verma of the HIV/AIDS Surveillance Program and the Massachusetts Department of Public Health Peer Reviewers for their comprehensive review of this report. Additional support was provided by Renee Henderson and Rattana Bip of the HIV/AIDS Bureau. Invaluable advice on the content and format of earlier editions of the Epidemiologic Profile on which this document is based was provided by the Epidemiologic Profile Advisory Group of the Massachusetts HIV Prevention Planning Group.

In addition to the HIV/AIDS Surveillance Program, data in this report were collected through the dedicated efforts of staff from the Counseling and Testing Program, the Client Service and Health Service Units and the Research and Evaluation Office of the HIV/AIDS Bureau; the Behavioral Risk Factor Surveillance System of the Bureau of Health Statistics, Research and Evaluation; the Pediatric Spectrum of Disease Project and the Sexually Transmitted Disease Program of the Bureau of Communicable Disease Control. Finally, we wish to acknowledge the clinicians who are responsible for reporting cases of HIV and AIDS to the State and those people infected with HIV and diagnosed with AIDS who supply vital and often personal information about themselves, enabling us to identify and respond to emerging trends in the epidemic.
